

1. Anterior rhinoscopy
2. Posterior rhinoscopy
3. Nasal packing
4. Mesopharyngoscopy
5. Indirect laryngoscopy
6. Indirect hypopharyngoscopy
7. Otoscopy
8. Cleaning of the ear canal- foreign body, cerumen
9. Differential diagnostics of hearing disturbances using tuning forks
10. Audiometry
11. Tympanometry, m. stapedius reflex measurement
12. Hearing examinations in little children
13. Endoscopy in ENT
14. Imaging in ENT
15. Examination of cervical lymph nodes
16. Congenital defects of the ear
17. Acute inflammation of the external ear
18. Trauma of external ear
19. Tubotympanic inflammation
20. Otitis media acuta
21. Complications in acute otitis media
22. Otitis media chronica
23. Specific symptoms of otitis media in children
24. Intracranial complications of otitis media
25. Reconstructive surgery of the middle ear
26. Otosclerosis
27. Injury of the middle ear, temporal bone fractures
28. Tumors of the external and middle ear
29. Hearing loss, differential audiological diagnosis
30. Phoniatric care of defects of hearing
31. Differential diagnosis of vertigo
32. Menier's disease
33. Harmful effects of noise to the organ of hearing
34. Toxic impairment of the inner ear
35. Temporal bone fractures
36. Acute sensorineural hearing loss
37. Chronic acoustic trauma
38. Presbycusis
39. Posterior fossa and vestibulocochlear nerve tumors
40. Facial nerve palsy
41. Deafness and rehabilitation possibilities
42. Early diagnosis of hearing impairment in children
43. Inflammation of external nose
44. Congenital defects of nose
45. Rhinitis - diagnostics and treatment
46. Acute inflammation of paranasal sinuses
47. Chronic rhinosinusitis
48. Nasal polyposis
49. Complications of inflammations of paranasal sinuses
50. Injury of the nose, face, fractures of maxilla, frontobasal fractures
51. Foreign bodies in the ENT organs
52. Epistaxis
53. Malignant tumours of nose and paranasal sinuses
54. Disturbances of smell
55. Hypertrophy of the lymphoepithelial tissue of pharynx/ vegetation adenoides
56. Chronic tonsillitis

57. Snoring, sleep disturbances
58. Angiophibroma iuvenile
59. Malignant tumors of nasopharynx
60. Principles of functional endoscopic endonasal surgery CT, MRI and ultrasonography of ENT diseases
61. Acute tonsillitis
62. Complications of acute tonsillitis
63. Acute and chronic pharyngitis
64. Para- and retropharyngeal inflammation processes
65. Tumors of oral cavity and oropharynx
66. Malignant tumors of hypopharynx
67. Zenker diverticulum
68. Trauma and caustic lesions of the oesophagus
69. Tumors of the oesophagus
70. Congenital defects of larynx and laryngomalacia
71. Acute inflammation of larynx
72. Complicated acute laryngitis in children /subglottic, crustous laryngitis/
73. Acute onset stenosis of the larynx and trachea
74. Chronic stenosis of the larynx and trachea
75. Chronic inflammation of larynx and precancerosis
76. Tracheotomy, coniotomy, intubation
77. Benign tumors of the larynx
78. Malignant tumors of the larynx
79. Disturbances of laryngeal motility and laryngospasmus
80. Trauma of the larynx and trachea
81. Defects of voice - organic and functional defects of speech
82. Congenital cysts and fistulas on the neck
83. Differential diagnosis of neck mass
84. Neck lymphonodopathy
85. Profound neck infections
86. Tumors of the neck
87. Metastasis into the neck lymphatic nodes
88. Carcinomatous metastasis into cervical lymph nodes with unknown primary tumor
89. Thyroid gland disorders
90. Salivary glands disorders
91. Tumors of salivary glands
92. Focal infections in otolaryngology
